

## 2016 Green Waste Recycling

In April, the ALTFSC made arrangements with the El Dorado County Fire Safe Council to fund 2 green waste dumpsters delivered to ALT for residents to use, with pick up and replacement of the dumpsters three times (a total of 6 dumpsters). This was the first time in several years that dumpsters were available locally for recycling. On the first day, a Saturday, both dumpsters were filled by 3:00 PM. El Dorado Disposal replacement dumpsters arrived on the following Wednesday and all 6 available dumpsters were filled within a 9-day period. The ALTFSC is planning to make arrangements to repeat the program next April. A very big THANK YOU to ALT Residents for taking advantage of this opportunity to recycle while reducing wildfire fuels and special thanks to Jeff Tolson who was responsible for setting up the program and being present all days that dumpsters were available.
